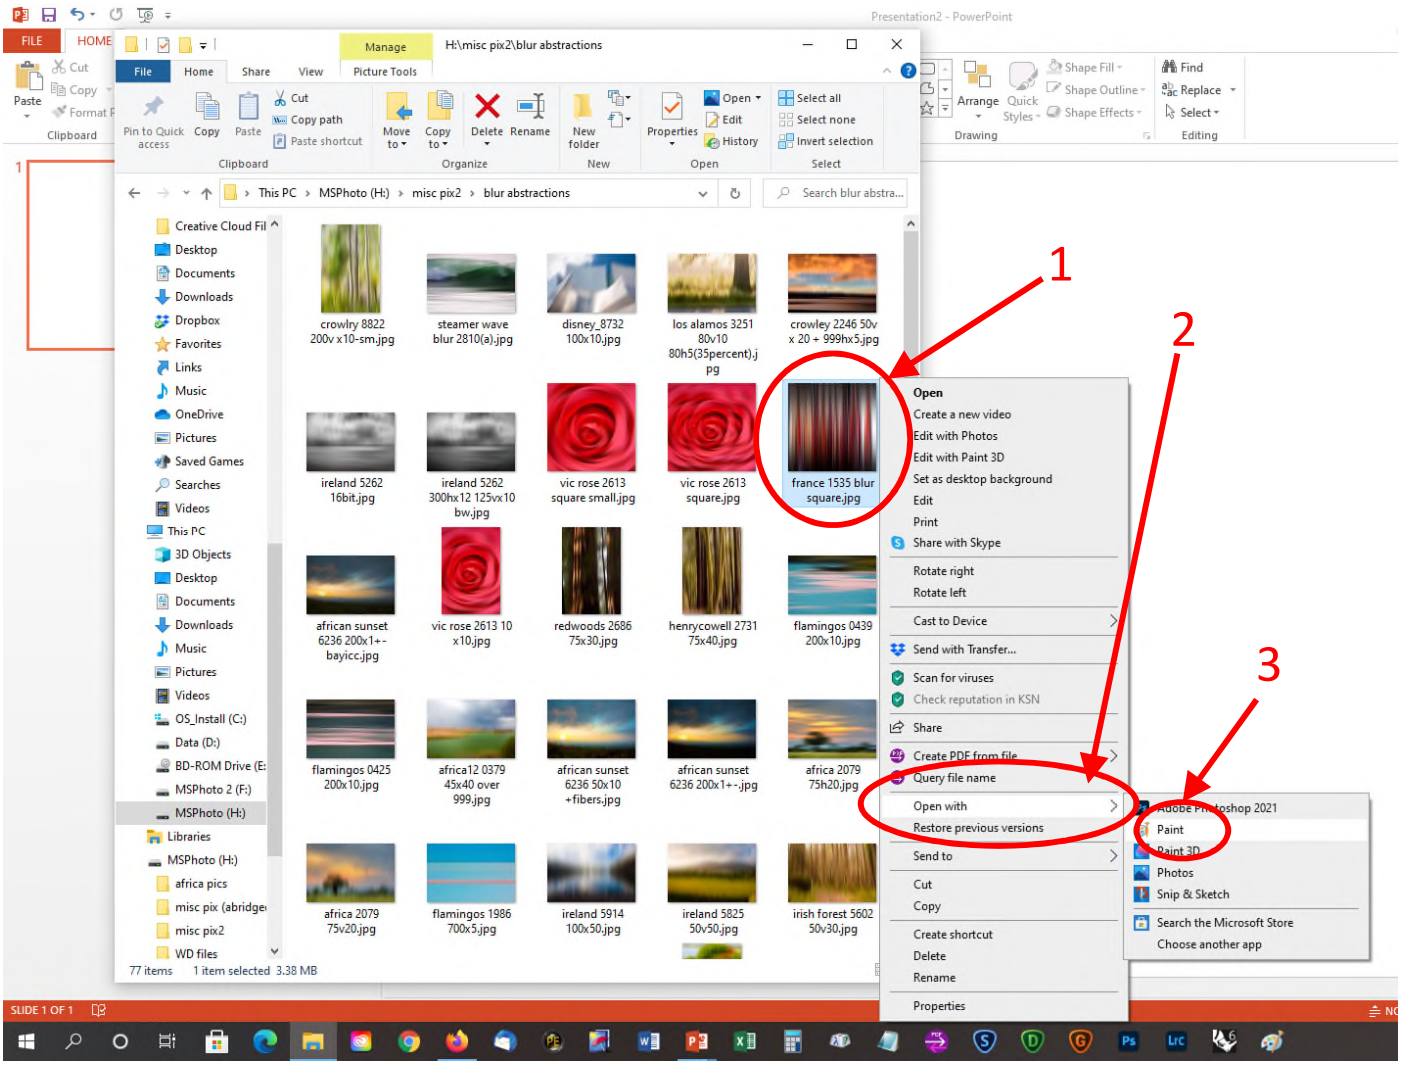
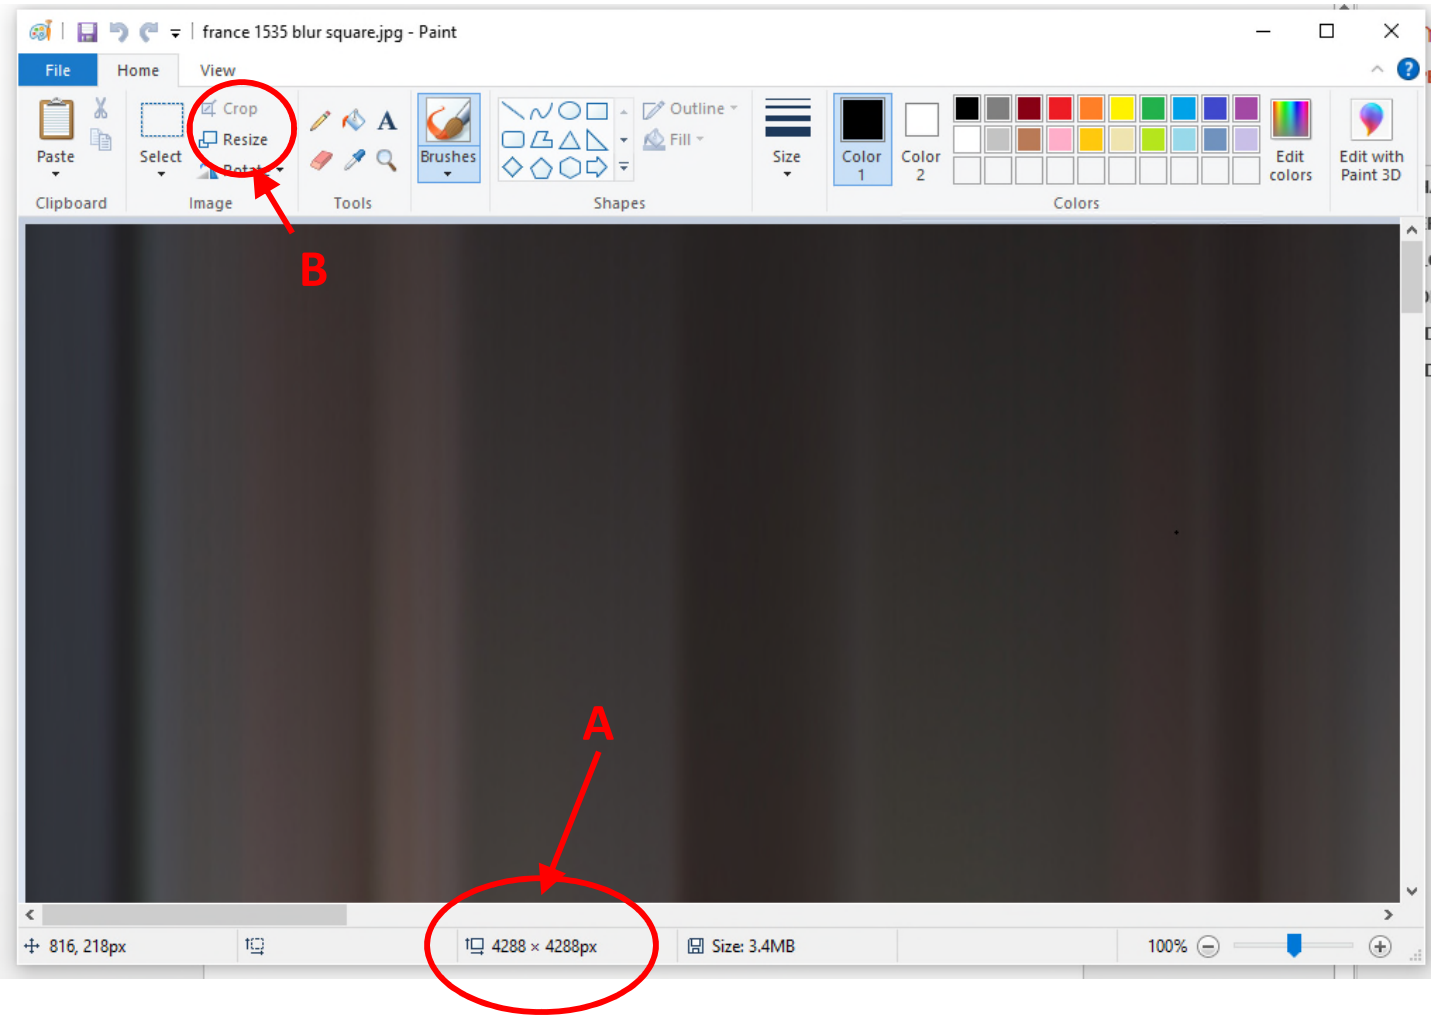
Resizing a digital image in “Paint” on a Windows10 computer.

Paint is a utility that comes with Windows …

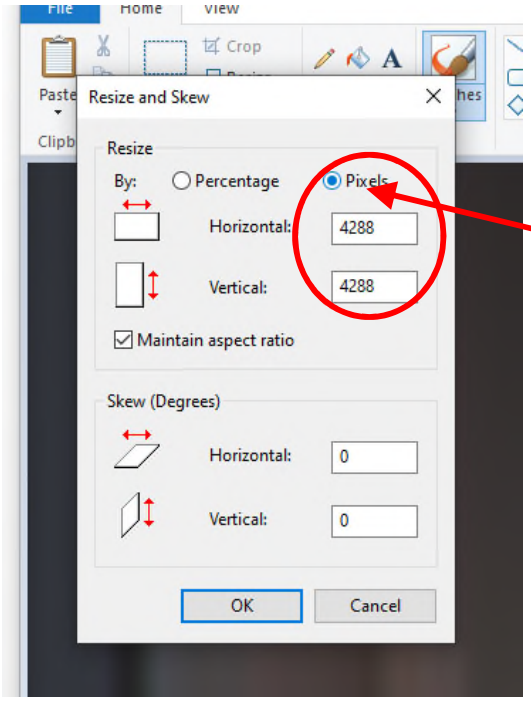
- In Windows Explorer, 1) right-click on the desired file, 2) choose “open with”, and 3) choose Paint…



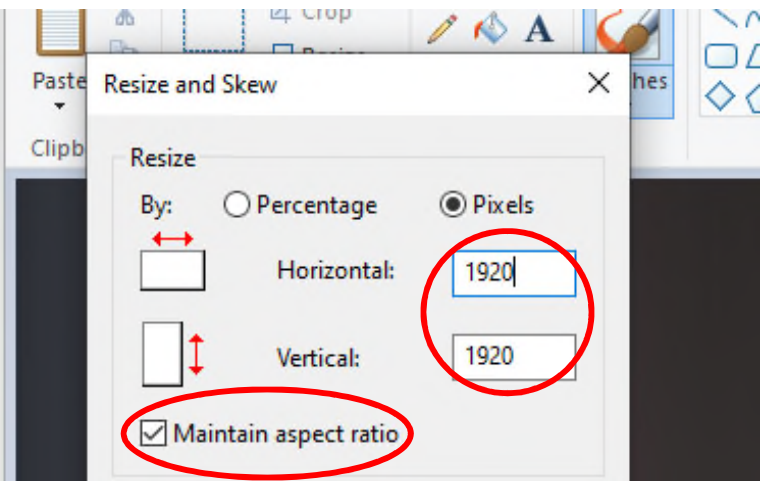
- The image will then open in the Paint application …

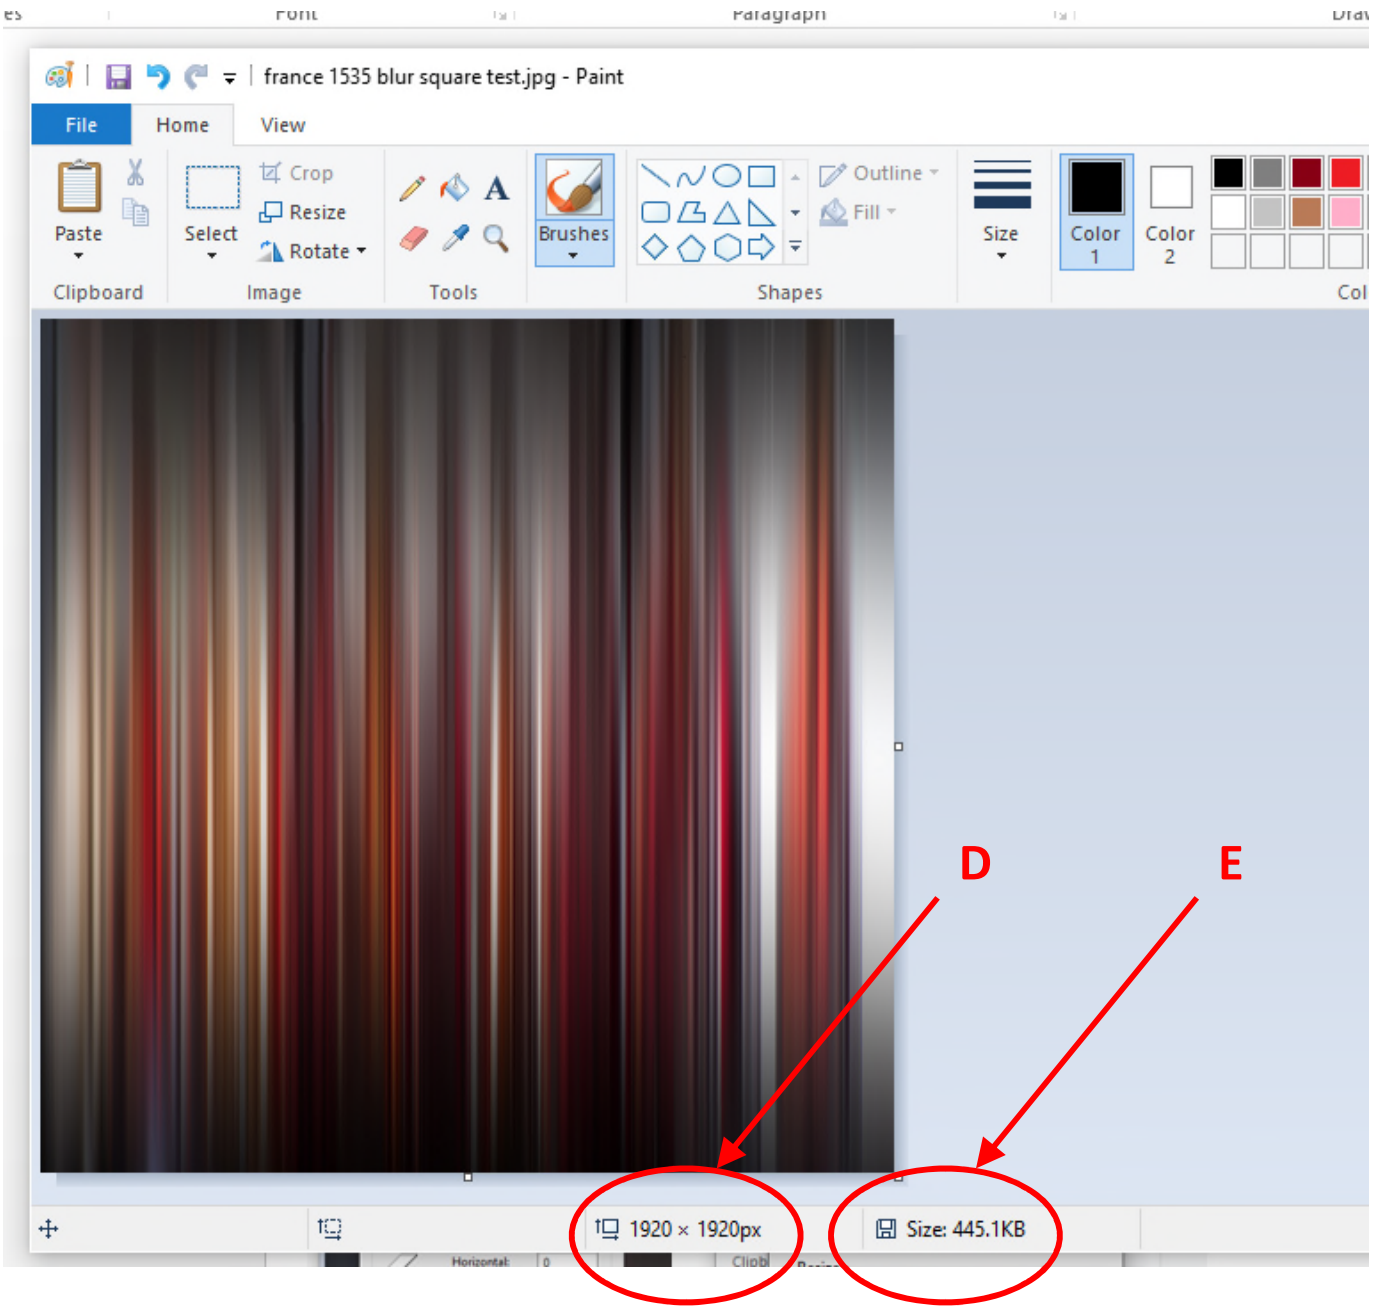


- The image may be zoomed to 100%, but the application will tell you the size of the file, in pixels (A) …



- Click on the Resize tool (B) … choose Pixels (C) … and type in 1920 for the larger of the numbers (the other dimension will automatically adjust when “maintain aspect ratio” is checked … then click OK …





- Next, from the File menu, click “Save As”, name your newly resized file, and click OK. Paint will now show you the new file size in pixels (D), and bytes (E) …

- Now you can close Paint, and you’re done!
